

VISUALIZATION MATCHING GAME

R.No	Reg. No	Name
6	192324244	B KIRTHANAA

Each chart on the left (A–J) matches exactly one description on the right (1–10). The matching number for each letter is given below with the reason.

SOLUTION:

Chart	Chart Image	Chart Type	No.	Matching Description	Reason
A		Histogram	9	Shows the distribution of a single continuous variable	Adjacent bars show how many values fall in each range of one numeric variable.
B		Line chart	6	Shows how a value changes over time	Points joined by a line show the rise and fall of a value from one time point to the next.
C		Bubble chart	5	Shows three variables at once using position and size	X and Y position give two variables and the bubble size gives the third.
D		Heatmap	4	Shows magnitude across two categories using color intensity	A grid of two categories where darker or lighter cells show larger or smaller values.
E		Stacked bar chart	7	Shows part-to-whole composition across categories	Each bar is split into segments, so the parts of each category's total are visible.
F		Bar chart	3	Compares amounts across separate categories	Separate bars with heights proportional to the amount in each category.
G		Area chart	10	Shows how a cumulative total changes over time	A filled area under a rising line shows a running total building up over time.
H		Scatter plot	8	Shows the relationship between two continuous variables	Each dot is one observation plotted by two numeric values, showing the trend between them.
I		Pie chart	2	Shows how parts contribute to a whole	Slices of one circle show each part as a share of the whole.
J		Box plot	1	Compares distributions across groups and highlights outliers	Each box shows the median and spread of a group, and points beyond the whiskers are outliers.
